

Dear Advanced Wireless Services Licensee:

The Department of Justice (DOJ) Spectrum Relocation Project Office has been established to oversee the 1710-1755 MHz spectrum relocation process for all affected DOJ Component Agencies. The DOJ Spectrum Relocation Project Office, under the Justice Management Division, serves to provide a fair and equitable electromagnetic compatibility (EMC) analysis support for early access of the 1710-1755 MHz band by Commercial licensees.

As an AWS licensee, or designated AWS Relocation Coordinator, you can submit your early access request and provide relevant technical details for analysis consideration through a central e-mail address, [DOJAWS@USDOJ.GOV](mailto:DOJAWS@USDOJ.GOV). Our office is also in the process of establishing a web accessible portal for data upload, analysis and tracking so hope to have a new submission method in the near future. Regardless of submission methods, analysis of early requests and dissemination of DOJ data will not occur until a formal Non-Disclosure Agreement has been signed and provided for file with the DOJ. Please feel free to contact the DOJ Spectrum Relocation team via the [DOJAWS@USDOJ.GOV](mailto:DOJAWS@USDOJ.GOV) e-mail address if you have any questions.

Sincerely,

A handwritten signature in dark ink, reading "Donna A. Hunter".

Donna Hunter
